FUTURE PROOFED

Future proof your solution through the acceleration of new feature / application deployment

SINGLE VENDOR

MiVoice Business delivers seamless communication and collaboration through the best complete single vendor solution

Today's modern employees are not restricted to a desk in an office, it will include colleagues working from home or whilst mobile. MiVoice Business enables your business to communicate and collaborate more effectively, no matter where they choose to work.

MiVoice Business is regularly deployed in multiple vertical markets, including:

- *Education*
- *Healthcare*
- *Finance*
- *Local & Central Government*
- *Sports Organizations*
- *Manufacturing*
- *Hospitality*

MiVoice Business offers a Complete Communications Solution

Businesses of all sizes are looking for comprehensive communications that ensures continuous personal and team productivity. By integrating unified communications, collaboration, desktop phones, and contact centers into a single solution, MiVoice Business delivers a seamless workflow that is simple and straightforward.

Embedded mobility solutions deliver employees greater freedom to communicate from wherever their business takes them, without the burden of escalating mobility costs:

- *Single Number – select up to 8 devices (regardless of design type) to act as their business phone, so all their phone numbers collapse into a single business extension.*
- *Hot Desking – Enable your employees to log into any Mitel MiVoice Phone, located at any of your offices, or even at their home, so they continue to be accessible and productive by having their calls routed to the device they are logged into.*
- *Teleworker – Provide remote and mobile employees with seamless, secure access to the full set of MiVoice Business capabilities wherever they are, using any Mitel desk phone or MiCollab Client soft phone.*

Deployment Flexibility

MiVoice Business has a deployment model to fit your organizations individual requirements. In addition to providing you a path to the cloud when the time is right for your organization.

In fact, with MiVoice Business as your organization's IT strategy evolves (for example: from distributed servers in multiple sites to a single private cloud) it can evolve with your business – delivering a strong and futureproof total cost of ownership (TCO).

ON-SITE

- Choice of Mitel 3300 Controllers
- Mitel EX Controller

- Industry Standard Services

VIRTUAL

- VMware and Hyper-V virtualization

PRIVATE CLOUD

- Private cloud deployment within your own data center

WHY PRIVATE CLOUD

A private cloud can leverage virtualization and converged infrastructure for cloud-like scale and

private cloud provides an extra layer of security and control to meet industry-specific compliance requirements.

Supercharging business productivity

MiCollab brings together voice, video, chat, messaging, web conferencing and team collaboration tools into a single solution. Making it easier for employees to connect with others and break down the silos associated with organizational departments.

Whether it's from their desktop or mobile device, with MiCollab employees can easily collaborate ideas and tap into the knowledge of others across the organization, regardless of their location.

With MiCollab your employees can benefit from:

- *Unified Communications (UC) services that make connecting with others an intuitive, seamless experience*
- *Team Collaboration services (MiTeam) that enable virtual, collaborative workspaces for group-based projects of any size*
- *Unified Messaging (UM) services that make message retrieval and management simple*
- *Collaboration services (Audio, Web and Video Conferencing) to power scheduled or ad-hoc teamwork between colleagues, and customers.*

efficiency, but in a private, dedicated system within your own data center. The protected nature of a

Bridge the communications gap

MiTeam Meetings delivers a multi-party video solution designed for those who want to schedule future video conferences or alternatively escalate from a chat to a video call in seconds.

Versatile family of Mobile First IP Phones

The Mitel 6900 IP series is a powerful family of 'Mobile First' IP phones that offer advanced integrations with mobile devices and applications.

Mobile integration capabilities allow users to pair their mobile phone directly to the 6900 IP phones to allow the management of both mobile phone and IP calls on a single device. The Mitel 6900 IP phones deliver crystal clear audio through the unique corded or cordless voice optimized handset and high-performance hands-free speakerphone

Unparalleled flexibility is achieved through a broad array of user installable accessories that tailor the phone to the specific user's need for increased mobility, improved workflows and enhanced communications.

The 6900 IP family has the functionality and flexibility to meet the needs of today's demanding work environment.

Today's customer is omnichannel – are you?

One-third of the population is comprised of millennials and there are now almost 5 Billion mobile phone users in the world. These shifts have brought new challenges to the way your business delivers customer experience. 90 percent of consumers check your website before interacting with your company, and most customers would rather interact through digital channels like email, chat, and social media.

Mitel's MiContact Center Business platform is designed to give your customers the freedom to interact with you on their preferred device, using

the media that works best for them while giving agents and supervisors the tools to manage today's omnichannel customer journeys.

MiContact Center Business comprises the following applications and tools:

- *Contact Center Management*
- *Interactive Contact Center and Interactive Visual Queue*
- *Workforce Scheduling and Schedule Adherence*
- *IVR Routing*
- *Omnichannel Contact Center*
- *Softphone and PhoneSet Manager*
- *Screen Pop*
- *Predefined Response Templates*
- *Outbound Dialing*
- *Remote Agents*
